

Paris Mollo

Computer Science Student

👤 Profile

Passionate about science and its applications on problem-solving urban challenges.

📁 Experiences

Software Engineer/Project Manager at CERN Program

January 2021 — February 2021

I was among the 5 finalists on the CERN Idea-square workshop. During the program, I learned the necessary skills to formulate a challenge and a solution to it, evaluate the solution in a systemic way, create and use prototypes, conduct stakeholder interviews, and communicate the proposed solution effectively.

Software Engineer/Project Manager at Open17Waters Program

October 2020 — November 2020

I led the project Potamoi, one of the participants of the Open17Waters Program. The 2020 Open17 Challenge on Urban Water Resilience is a program that promotes challenge-based innovation through student teams working on the development of practical solutions to challenges related to innovating for urban water resilience.

Data Analyst at Botmind, Paris

September 2019 — December 2019

- Data Cleaning & Data Labeling for Chat bot
- Creation of a script for qualification of prospects and the development of an application module

Speaker at Tedx Talks, Aix-en-Provence

December 2018 — March 2019

I had the opportunity to assess the multiple effects of **NEETS** on the global economy and discuss how we can use technology to help young people collaborate on projects.([video link](#))

Software Engineer at WeCashUp, Marseille

May 2018 — September 2018

- Responsible for the implementation of the Hyperledger Fabric system. (IBM Blockchain)
- Creation of a business network with Composer Hyperledger
- Development of smart contracts with EVM

Data Analyst at Biscoitê, São Paulo

January 2017 — June 2017

- Time Series Analysis & Exploratory Data Analysis
- IBM Watson Implementation Project
- Management of product tax rates & Stock management
